

Energy Efficiency and funding options

Commercial, industrial, agriculture and hospitality industry

Program:

10:00 Registration
10:30 Welcoming and Safety
10:40 Overview of Integrated Demand Management (IDM)
11:00 Standard Offer Funding
11:30 Standard Product Funding
12:00 Rebates available
12:15 Break
12:30 Heat pump technologies
12:50 Solar water heaters
13:10 EE lighting and LED
13:30 Motion Sensors
13:45 EE aircons
14:00 Summary and conclusions

All are invited to a light lunch afterwards

Date and Venue:

31 Aug: Pretoria – CSIR Ruby Auditorium
01 Sep: Rustenburg - Heuwelzicht
06 Sep: Polokwane - Bolivia Lodge
07 Sep: Tzaneen - Tzaneen Country Lodge
13 Sep: Witbank / Middelburg Pienaardam
14 Sep: Nelspruit - Bundu Lodge
20 Sep: Bela Bela/Thabazimbi Phil-marie Lodge
27 Sep: Brits/Rosslyn – Thatchhaven Country Lodge

RSVP: MareeY@eskom.co.za

Funding is now available for savings projects from 1 kW to 5 MWs in size

The Eskom Northern Region's Energy Services team invite all customers (Eskom and municipality) to an information workshop on the new funding options available. Until recently only a limited number of funding options were available, mostly suitable to larger customers or projects, as well as rebates to the residential households.

Due to the need in the market, more funding options have been developed that are more suitable to the commercial, industrial and agriculture customers, and to the hospitality industry. The focus will be on these funding options during the workshops:

Improved Standard Offer Funding: This is for projects of 50 kW to 5 000 kW in savings. Eskom will pay for savings between 6:00 and 22:00, Mondays to Fridays, at 42c per kWh over a three-year period.

Standard Product: This is for projects of 1 kW to a 100 kW in savings, with a minimum of 2 000 kWh savings per annum.

Rebate for Hot-water Systems: The current Solar Water Heater Rebate programme and the new Heat Pump rebate programme.

The aim of the workshops is to inform customers of the funding options, the process to submit a project, the documentation required, measuring and verification requirements and the processes Eskom will follow in approving these projects.

There will be technical experts presenting on technologies such as heat pumps, solar water heaters, energy efficient lighting and LEDs, motion sensors and energy efficient aircons. Suppliers will also exhibit their energy efficiency technologies.

Please RSVP with the following details: which event you will attend, name and surname, company name, cell phone number and e-mail address

Please RSVP to Yolande, e-mail MareeY@eskom.co.za
